EXPERIENCE

Software Engineer

Samta Infotech Private Ltd.

2022 – Present

Sector 62, Noida

- **Spearheaded** critical R&D and complex library integrations for an enterprise-level banking software, including the in-depth modification and integration of *dmn.js* (rule engine) and *Formio* (form creation framework) into the **React/Next.js** codebase, overcoming challenges of limited documentation to meet specific business requirements.
- **Contributed significantly** to core banking modules such as Account Opening, *Loan Origination System (LOS)*, *Loan Management System (LMS)*, and Collateral management, culminating in the **successful delivery** of the *LOS* journey for a fintech event showcase.
- **Developed** the interactive user interface for *VEDA*, an **AI-powered Business Intelligence Platform**, leveraging **React.js** and **ECharts** to visually present enterprise data through interactive charts, tables, and summaries, **enhancing data comprehension**.
- **Operated with high autonomy**, conducting extensive research on open-source and paid solutions for diverse document viewing within the application, and **independently driving** key development initiatives.

Software Engineer

Blackcoffer OPC Private Limited

March 2021 – 2022

Najafgarh, Delhi

- **Developing Frontend** using **Next.js** and **React.js**
- **Developing Backend** using **Node.js** (Express), **MongoDB**
- **Leading a team** in architecting, implementing, testing and releasing several projects
- **Providing guidance and mentoring** to Juniors.

Full Stack Developer, Intern

Tarvisor

March 2020 – September 2020

Mumbai

- **Developing tool** to modify website content.
- **Developing web app** for GST filing.

PROJECTS

Ampere | *React, Next.js*

November 2021 – Present

- Developed front-end for the project using React and Next.js
- Creating visualizations for the better understanding of data

TimerCards | *React* | [Live Source code](#)

2020 – Present

- Developing a Web application that runs multiple timers in sequence and parallel
- Developed an accurate countdown timer using Web worker
- Improved performance to support more than 300 running timers at once
- Developed a questionnaire system that give next question depending upon the user choices.
